

# COVID-19 VACCINATION INFORMATION

WVU Medicine Uniontown Hospital is committed to working with the state Department of Health, along with local and county officials, to assist in COVID-19 vaccination distribution.

We have utilized our entire initial allotment of vaccines on hospital doctors, nurses and staff, and were also able to provide 30 percent of initial shipment to community providers, EMS, first responders and other local health care personnel.

We ask for your patience as we await details from state and local health officials regarding future phases of the vaccine.

If you have questions regarding vaccine availability locally, please call **724-430-8753** for assistance, or email **[irlu@utwn.org](mailto:irlu@utwn.org)**.
